

S O C

SUPER OVEN CLEANER

S.O.C is a highly alkaline oven and grill cleaner which quickly dissolves heavy grease and food build up on ovens and hot plates.

S.O.C decarbonises, decrusts and defats in one operation. A powerful formula provides S.O.C with the strength to remove burnt on carbon and grease deposits from cast iron, stainless steel, glass, enamel and ceramic surfaces.

FEATURES

Biodegradable
Concentrated
Fast acting
Highly alkaline

ADVANTAGES

Safe to the environment
High dilution rates
Saves time
Strong grease and fat neutraliser

BENEFITS

Peace of mind
Economical
Saves money
Excellent in food preparation areas

SPECIFICATIONS:

Colour: Brown
Hard Water Tolerance: Excellent
Flammability: Non Flammable
Biodegradability: Fully

Odour: Odourless
Rinsability: Complete
Type: Highly alkaline cleaner

HOW TO USE:

Use S.O.C. to effectively clean ovens, grill plates, fry pans, rotisseries, cook tops and deep fryers.
OVENS: Heat oven to 50 C and switch off. Allow to cool for 5 to 10 minutes then squirt onto the side wall of the oven first, then top and bottom. Allow to work for five to ten minutes on warm surfaces or 20 minutes on cold surfaces. Wipe off with damp cloth, sponge or paper towel.
HOT PLATES: Squirt SOC onto warm hot plate (50 C). Agitate with scourer or scraper then rinse off with potable water. It is advisable to seal hot plate after cleaning with a small amount of butter or margarine otherwise the hot plate may corrode.
NOTE: Do not use on a HOT oven or grill plate turn the appliance OFF and allow to cool before using.
