

Make your Staff and Customers Feel Safe & Secure.

Nanocyn® is entered into the TGA ARTG as a registered, hospital-grade disinfectant, approved to kill bacteria and viruses including SARS-CoV-2 (COVID-19) and Norovirus (Gastro) as well as Influenza, Fungi and Mould in 30 seconds.

GUARANTEED SAFETY

NON-TOXIC

HIGHEST STANDARDS

- ⊕ Eliminates viruses within 30 seconds of contact time.
- ⊕ Contains, controls, and eliminates a wide range of pathogens common in the aged care environment.
- ⊕ Non Toxic – can be safely used without vacating premises which reduces labour and patient risk.
- ⊕ Neutralises odour.
- ⊕ Available in 3 convenient size options including ready to use.
- ⊕ Easy application using fumigation machines.
- ⊕ Delivers results up to 3x greater than traditional disinfecting equipment in a shorter time frame.

Nanocyn.

MicroSafe® Guarantees:

100% Natural

Nanocyn® can safely be used around people, such as staff and visitors. It has NO hazards on the label, requires NO safety equipment, is pH-Neutral, 100% Biodegradable, and poses NO risk to the environment. Nanocyn® is GECA certified.

20 Years Experience

MicroSafe has been heavily involved in infection control for almost two decades. They were heavily involved in previous pandemics such as SARS, MERS and Ebola, providing cutting edge technology that is safe for people yet deadly for pathogens.

Quick to Apply

Our technology is the only one in the world able to disinfect an entire standard room in under 2 minutes, instantly creating a hospital-grade environment without residues that might be dangerous to people and materials in the longterm.

BACTERICIDAL • VIRUCIDAL • FUNGICIDAL
