

What is a Green Washroom?

Going green is no longer just about using recycled products. Being green is about implementing and using products that create a healthy living environment and enhance your working environment.

Green products take in to consideration all aspects of the product lifecycle including energy efficiency in manufacturing, the volume of natural resources consumed and the end effect on our environment.

Green Washrooms is your complete innovative and environmentally responsible washroom program.

BAY WEST Washroom Paper Products

By incorporating **Bay West EcoSoft™ Premium Green** paper products with our innovative Bay West EcoSoft™ Controlled-Use, 100% recycled paper products, you can meet the demand of the busiest washroom environment.

Our Bay West range of controlled-use dispensers are designed specifically for high traffic away-from-home environments. Take your choice of controlled-use dispensers that provide an elegant coordinated washroom appearance. Designed to reduce waste, reduce consumption and reduce maintenance requirements, our sturdy, colour coordinated dispenser offering will be a welcomed edition to your washrooms.

EcoSoft™ Premium Green Sustainable Towel and Tissue

How tree friendly is your recycled paper?

Sadly, based on most global definitions, recycled paper can still contain virgin pulp. Hence trees could still be cut down in the manufacture of your recycled paper products.

Bay West EcoSoft™ Premium Green towel and tissue products are made from 100% recycled wastepaper and are derived from 100% post-consumer waste, thus making EcoSoft™ Premium Green products among the most environmentally preferable towel and tissue lines available in the away-from-home market.

Thoughtful Consumption

Bay West EcoSoft™ Premium Green towel and tissue products can help your organisation adopt the powerful concept of Thoughtful Consumption, to further enhance any existing environmental stewardship programs already in place.

Trees help us breathe and provide a home for countless numbers of animals and insects. Trees are the largest and longest living organisms on earth and form an integral part of our ecosystem and our planet.

The lifecycle of a tree is significantly extended through the manufacture of 100% recycled, 100% post-consumer waste paper products.

Why terminate the full lifecycle of a tree to simply manufacture towel and tissue products, when, for example, the material could be sourced from a cardboard carton, which was sourced from a newspaper, which came from a text book, which in turn was derived from a phone book?

MAKING CONSCIOUS DECISIONS ABOUT YOUR CONSUMPTION HABITS CAN ONLY BENEFIT YOU, YOUR WORKPLACE AND OUR ENVIRONMENT.

Our Green Washroom Products

Bay West EcoSoft™ Premium Green paper products have been independently tested to ensure that not only are you purchasing an environmental alternative, but the quality, brightness and strength of our products are of the highest standard.
