

Nilfisk Commercial vacuum cleaner

Nilfisk GD 930/930S2

Rugged, stable and powerful

Where cleaning is critical, an optional HEPA filter capable of capturing 99.997% of particles down to 0.3 microns is available

The large wheels, castor and low profile of the GD 930 make it exceptionally easy to use

Nilfisk GD 930/930S2 is a world class dry vacuum cleaner for effective daily cleaning of large areas. GD 930 is the reliable choice for demanding cleaning applications in hotels, schools, offices and hospitals. Rugged and stable, with a large dust bag capacity of 15 litres. The ingenious design optimises air flow patterns and reduces energy losses to an absolute minimum. The result is tremendous suction power with just a gentle humming background sound. With the excellent HEPA filter filtration system it stops even the tiniest particles - animal hairs, dust mites or even smaller nuisance dust. All models include a lightweight aluminium tube as default accessory.

For even quieter operation in noise sensitive operations such as work hour cleaning in offices, or hospital ward vacuuming, the GD 930 S2 offers two-speed variation to cut the sound level to 49 dB(A).

The multi-layer filtration that is standard on all GD 930 units efficiently captures even microscopically small particles and prevents them from being exhausted back into the atmosphere.

- Wide working radius – 15 m cable
- 15 litre dust bag
- Telescopic tube on S2 for extra comfort
- Sturdy steel container
